REGULATING

USFUL TOOLS

Here are some free tools that can be used to manage imbalanced screen time:

1. SCREEN TIME (BUILT-IN ON IOS DEVICES):

This tool allows you to set time limits for specific apps or categories of apps, and also provides a weekly report on your screen time usage.

2. GOOGLE FAMILY LINK:

This tool allows you to set screen time limits for your child's device, approve or block apps, and set bedtimes and device "off" times.

3. RESCUE TIME:

This tool tracks how much time you spend on your computer and mobile devices, and provides detailed reports on your usage. You can set goals and alerts to help you stay on track.

4. **FOREST:** This app is designed to help you stay focused by planting virtual trees that grow as you stay off your phone. If you leave the app to check your phone, the tree will wither and die.

5. **FLIPD:** This app allows you to lock your phone for a set period of time, and also provides tools for scheduling phone-free time, setting reminders, and tracking your progress.

6. **STAYFOCUSD:** This browser extension for Google Chrome allows you to set time limits for specific websites or categories of websites, and also provides a "nuclear option" that blocks all websites except for those on your whitelist.

7. **COLD TURKEY:** This desktop app allows you to block specific websites or apps for a set period of time, and also provides tools for scheduling breaks and setting goals.
